compiled by  
W. Bruce Fye, M.A., M.D.

Issued in conjunction with an exhibit on "American Contributions to Cardiovascular Medicine and Surgery" at the National Library of Medicine, September-December, 1986. The exhibit was prepared by the Library's History of Medicine Division with the National Heart, Lung and Blood Institute as a companion activity to the 10th World Congress on Cardiology, held in Washington, D.C. in September, 1986. The assistance of W. Bruce Fye, M.D. and of the American College of Cardiology in preparing the exhibit is gratefully acknowledged.

An earlier version of this bibliography was published in *Circulation*, volume 64 (1981), pages 434-436 under the title "History of Cardiology." It is reprinted here in revised and expanded form by permission of the American Heart Association, Inc. For a key to journal abbreviations used herein, see the National Library of Medicine's *List of Journals Indexed in Index Medicus* 1986.
